

SUSTAINABILITY POLICY

Chiva-Som International Health Resorts Co., Ltd. is committed to the holistic approach to wellness, and provides a sanctuary nestled within seven acres of lush tropical gardens. Here amongst the peace, guests come to rest, relax, rejuvenate and focus on their life-long goal of improved health and vitality. Chiva-Som is a pioneer, combining traditional Asian therapies with a Western approach to health and wellness. We offer extensive fitness, spa and holistic health facilities designed to balance and revitalise the mind, body and spirit. Hosting 54 stylish guest rooms, our beachfront health resort represents tranquility at its best with luxurious accommodation and modern facilities including individual treatment rooms, an expansive indoor bathing pavilion and sea-side outdoor pool, male and female water therapy suites with multi-level steam rooms, saunas, plunge and hydro pools, Jacuzzis, a Watsu pool, a functional gym and a rehabilitation gym, and restaurants offering wellness and farm-to-table cuisines.

At Chiva-Som, we understand the connection between the health of the environment and ourselves. We remain committed to the preservation of the planet, and are proactively involved in conserving precious natural resources as we grow into the future. Our approach to being environmentally responsible and ethical is based on six dimensions: energy efficiency, water efficiency, resource efficiency including a zero-waste approach, sustainability knowledge, corporate social responsibility, and sustainability acknowledgement.

Our sustainability objectives and benchmarks are reviewed annually in accordance with internal and international best practice targets. Corporate Social Responsibility is paramount in developing our staff members, their families and the communities around us. Further afield, our outreach includes social welfare, local supplier relationships, Preserve Hua Hin collaborations, sustainability education programmes in the local community, and maintaining the Krailart Niwate Mangrove Ecosystem Conservation and Preservation project.

We are committed to achieving sustainable business operations and minimising any negative impact we have on the environment, and we will continue to provide sustainability awareness to all our stakeholders. Our annual policy review supports continual process improvement and adherence to our environmental and sustainability objectives.
