

# PILLOW SELECTION

SUGGESTION FOR SELECTING THE PROPPER PILLOW

## Consider how you sleep

On your back, your side, or your stomach? Pillows are designed to keep your spine in proper alignment while you repose. If you sleep on your back, consider a softer pillow for your head, and perhaps a pillow beneath the knees to alleviate back strain. For side sleepers, the best pillows are firmer and denser, to keep a spine well aligned through the neck. Add a body pillow to ease the upper limbs and float in dreamy comfort.

## PILLOW SELECTION

If you enjoy sleeping on your stomach, again, a slim, soft pillow is the best choice; try placing another slim pillow beneath your stomach to gently hold your spine straight.

Chiva-Som offers pillows for every relaxing moment, whether sleeping, reading or lounging by the balcony. Pillows are hypo allergenic, using high thread count Japara cotton, which is impenetrable by dust mites.
